Are you looking to expand in Canada?

W.R. Controls can help by providing our custom integrated electrical distribution solutions in Canada with the same level of expertise and customer service that makes us an industry leader in the US. Our parent company, WESCO Distribution, Inc., is a market leader in Canada with 48 branch locations and 3 fully automated distribution centers. Additionally, our manufacturing partner, Eaton Corporation, operates 21 manufacturing facilities in Canada.

Whether your business involves dining, retail, or quick service, you can expand your chain at lower expense and with greater efficiency! W.R. Controls can integrate all your electrical power distribution, energy management controls, and data communications requirements into a single compact unit custom designed to maximize your selling or storage capacity at each location.

Built In Canada

Utilizing Eaton and WESCO's superior Canadian manufacturing and distribution facilities, W.R. Controls is most capable and fully committed to supporting retail rollouts across all of Canada.

Powering Business Worldwide

Wherever You Are... We've Got you Covered

There's more in the W.R. Controls box

At W.R. Controls, it's not just a product and a price. When you invest in our solutions, we take ownership of the project from your order through successful start-up and continuing operations. Our business is making your electrical problems go away, even after installation.

The W.R. Controls IFS Switchboard

It's flexible handling stores from 900-250,000 sq. ft. It's custom designed to meet your exact requirements for now and for the future. The IFS Switchboard delivers significant field labor savings, site to site consistency, and 50% average space savings. Additionally, the switchboard arrives in one shipment, factory assembled, prewired and tested.

Project ownership – not project management!

Project ownership means taking full responsibility for every detail of your custom designed electrical solution. At W.R. Controls, we "own" the project so you don't have to. Furthermore, W.R. Controls' project ownership teams set the standard for customer service.

National Strength, Local Service

With a firm commitment and investment from parent company WESCO Distribution, Inc. (WESCO:WCC); W.R. Controls continues into the 21st century as the leader in distribution technology, products and value-added services.
